TOGETHER, WE TURN WATER INTO ACTION
One Drop™ is an international foundation created by Cirque du Soleil founder Guy Laliberté with the vision of a better world, where all have access to living conditions that allow empowerment and development, today and forever. One Drop’s mission is to ensure sustainable access to safe water and sanitation for the most vulnerable communities, through innovative partnerships, creativity, and the power of art.

One Drop and its partners deploy a unique Social Art for Behaviour Change™ approach designed to promote the adoption of healthy behaviours around water, sanitation, and hygiene. This approach uses locally inspired social art programs to empower communities to take ownership of their water projects, which ensures both long-term impact and sustainability.

In order to make these projects possible, One Drop creates and produces novel fundraising initiatives supported by a visionary community of partners and donors. Together, we turn water into action.
WHY WATER?

WATER IS ESSENTIAL TO LIFE, AND ACCESS TO SAFE WATER IS ONE OF THE Most efficient ways to support individual and collective development.

- **2.1 BILLION** people do not have access to safe water at home.
- **896 MILLION** people use health care facilities that have no water services.
- **NEARLY 570 MILLION** children lack drinking water at school.

From the very beginning of this One Drop adventure, I’ve been amazingly fortunate, having had the opportunity to collaborate with countless artists, companies, and global organizations from all spheres of international development, arts, and business. Leaders of change who join forces and share their efforts, knowledge, and financial resources, united by the common goal of making a difference in the world.

I’m proud to say that today, One Drop and its partners are creating sustainable water projects that truly make the world a better place. One fundraising event at a time, project by project, we get closer and closer to achieving access to safe water and sanitation for all.

Join us! Because together, we really are powerful. Powerful enough to change the world. With sustainability in mind and boundless creativity in our DNA, let’s foster positive change. Let’s create an impactful partnership. Let’s take action now!

GUY LALIBERTÉ,
Founder of One Drop, Lune Rouge and Cirque du Soleil
One Drop ensures that water and sanitation facilities are available and sustainably managed in the vulnerable communities in which we work by providing safe and equitable access to services, activating behaviour change through social art interventions, and supporting market-based solutions. These are the three components we use as a united force to help communities reach their full potential and to create an enabling environment for change.
ACCESS
Access to clean water and sanitation infrastructure has a direct impact on key health, education, and other social outcomes. At One Drop, we go far beyond building wells and latrines. We bring together local leaders, organizations, and communities and help them take ownership of their future by working on capacity-building initiatives concerning the operation, maintenance, and governance of water, sanitation and hygiene infrastructure.

BEHAVIOUR CHANGE
The science is clear: behaviour change is the missing link that ensures the long-term benefits of water and sanitation infrastructure. Communities must embrace healthy hygiene practices, the proper use of water, and the maintenance of the water and sanitation infrastructure in order to preserve water as a resource and to maintain people’s health. To address this challenge, we have developed a unique approach called Social Art for Behaviour Change, which is designed to foster the long-term adoption of healthy behaviours around water, sanitation, and hygiene as a means of empowering communities.

CAPITAL
With financial support, water-related initiatives can create a powerful ripple effect and lead to sustainable development for entire communities. Partnering with microfinance institutions, we guide market-based solutions to make water, sanitation, and hygiene accessible to all, and we ensure that the demand for products and services is met by the right offer. By supporting income-generating activities, we increase household incomes and improve living conditions.
The international water, sanitation, and hygiene sector is in agreement: communities must embrace healthy behaviours to achieve Sustainable Development Goal 6: “Ensure availability and sustainable management of water and sanitation for all”. And this is where our creativity-infused DNA, something we inherited from our founding partner Cirque du Soleil, comes in. It was a deep understanding of local cultures that inspired us to develop an extraordinary approach that puts people and emotions first as a means of tackling hygiene and sanitation-related behaviours such as, among others, handwashing with soap and properly maintaining a latrine.

**SOCIAL ART FOR BEHAVIOUR CHANGE**

The idea is to connect with the emotional part of the brain as a way to inspire, activate, and sustain the adoption of healthy behaviours around water. This approach improves individuals’ leadership skills while increasing communities’ sense of involvement, ownership, and empowerment.
In Mexico, following artistic workshops with children, 
**62% of the participants reported washing their hands with soap more than 5 times a day**, up from only 5% prior to the intervention.

In India, community art workshops led to communities participating wholeheartedly in adopting their new water infrastructure, even if it involved a payment plan for maintenance. **54% of the targeted communities participated, which is a success rate more than 10 times better than the usual 5% for this type of intervention.**

In Nicaragua, a study revealed that **85% of the infrastructure installations were still in use 2 years after the intervention**, while statistics typically show only 50–70% functionality rates in water infrastructure projects.

WE HAVE OUR OWN WAY OF RAISING FUNDS...

Project after project, we demonstrate how art and creativity can actually become a powerful catalyst for change.

And our creativity does not stop at the way we approach our projects.

We are also creative in the way we approach partnerships and in the way we build fundraising initiatives. We have come up with new ways of raising funds, by adding meaning to MUTUALLY BENEFICIAL PARTNERSHIPS and designing NOVEL FUNDRAISING CAMPAIGNS AND EVENTS worldwide. Thanks to our track record and our wealth of experience, as well as our contacts in the worlds of arts, culture, and entertainment, we have the skills to imagine new sources of financing, often from sectors that are not traditionally associated with philanthropy.

WELL AS DONATIONS FROM INDIVIDUALS
GO DIRECTLY TO ONE DROP’S PROGRAMS.
To achieve our goals, we join forces with experienced executing partners, key local government actors, international development institutions and country agencies, like-minded foundations and visionary corporations and philanthropists. By working together with multiple stakeholders, **OUR AIM IS TO MULTIPLY THE AMOUNT INVESTED BY ONE DROP BY AN AVERAGE FACTOR OF 6.**
We put the right people around the table to increase funding and scale up our projects. These collaborators also contribute by sharing their knowledge and expertise. By partnering with like-minded organizations, we benefit from synergies and economies of scale and therefore considerably increase the number of lives we transform.

For example, in the ECED-SAHEL project in Burkina Faso, over 7 times more than the initial investment was raised.
